

# BiziBar

## KPIs for CIO / IT Manager

**Note** that in most cases the reports shown below may be sorted by clicking on the header.

- **Current Sessions:** Number of current sessions
- **Database Files:** Database files and their status
- **Database Parameters:** Fifteen Oracle database parameters are shown on each page of this scrollable list.
- **Database Sessions:** Total number of database sessions
- **DBA Tuning Files:** A link takes the user to the DBA Tuning Files, a series of reports that are stored as binary objects in the database.
- **Package Bodies:** Total number of package bodies and invalid package bodies
- **Packages:** Total number of packages and invalid packages
- **Posted Jobs:** A bar chart showing the total number of posted jobs that have been posted by hour and by day. The user has the ability to scroll through the past month of data if needed.
- **Table Spaces:** Database table spaces showing, by table space name, total size, total free, percent free, max free, and chunks free, and links to pie charts showing this data graphically.
- **Triggers:** Total number of triggers and invalid triggers
- **Views:** Total number of views and invalid views
